The book focuses on the development perspectives of rural regions in 5 Balkan countries: Bulgaria, Croatia, Greece, Romania and Slovenia. Its main objective is to assess the implications for inter-sectoral rural employment patterns of policy changes at domestic and EU levels. The study identifies five rural regions (one for each country) as case studies. Input-Output (I-O) analysis is carried out on the selected regions to study in detail the structure of rural employment and to assess policy impact. Policy impact analysis is achieved through the definition of policy scenarios taking into account EU accession status, EU policies and other specific regional policies. The impact of the different scenarios on regional non-agricultural and agricultural output, employment and income is evaluated including those within the regional I-O models.

Andrea Bonfiglio is researcher in the Department of Economics, Università Politecnica delle Marche – Ancona (Italy).

Roberto Espositi is senior researcher in the Department of Economics, Università Politecnica delle Marche – Ancona (Italy).

Franco Sotte is full professor in the Department of Economics, Università Politecnica delle Marche – Ancona (Italy).

6. Allocation of Funds 128
7. The impact of EU pre-accession and accession measures on the economy of the Bulgarian rural regions, Plamen Mihnev, Nedka Ivanova and Antoaneta Golemanova
1. Introduction 133
2. Importance of Rural Areas in Bulgaria 133
3. Policy framework for the development of the rural regions in Bulgaria 134
   3.1 National Economic Development Plan (NEDP) 134
   3.2 National Agriculture and Rural Development Plan under SAPARD 135
   3.3 Regional Operational Programme of Bulgaria, 2004-2006 136
4. North-East Region 136
5. Relevant national and regional scenarios 138
6. Data used 140
7. Results of the impact analysis at national and regional level 148
   7.1 National Scenario “Accession” 148
   7.2 Regional Scenarios 149
8. Concluding remarks 150
8. Potential impacts of EU-funds on a rural region of Croatia, Zaljko Mijanovic, Branko Grivic and Blanka Petkovic
1. Some general information about Croatia 163
   1.1 Economy (general) 163
   1.2 The milestones towards EU 168
2. The selected region for the impact analysis 169
   2.1 Economy (general) 170
      2.1.1 Agriculture and food industry 171
      2.1.2 Wood industry 172
3. The analyzed policy instruments and the definition of the relevant scenarios 173
   3.1 The pre-accession assistance 173
   3.2 The available EU funds after the accession 175
   3.3 The definition of relevant scenarios 176
12. A dynamic impact analysis of pre-accession and accession EU policies: the cases of Romania and Bulgaria, Andrea Bonfiglio

1. Introduction 291
2. Identifying policy scenarios 291
3. Methodology to assess policy impact 294
3.1 Projecting national I-O tables 295
4. Projecting regional I-O tables 299
5. Allocation of funds 301
6. Policy impact analysis 303
6.1 Romania
   6.1.1 The national level 304
   6.1.2 The North-West region 305
6.2 Bulgaria
   6.2.1 The national level 307
   6.2.2 The North-East region 309
7. Concluding remarks 310

5.5 Slovenia
5.5.1 Pre-accession funds 355
5.5.2 Post-accession funds 356
5.6 Conclusions 358

6. The agricultural sector
6.1 North-East Bulgaria 360
6.2 Bjelovar-Bilogora 361
6.3 Thessalia 362
6.4 North-West Romania 363
6.5 Peripheral Slovenia 363
6.6 Conclusions 364

7. Time varying coefficients analysis
7.1 Bulgaria 366
7.2 Romania 369
7.3 Comparison between the two regions and the static analysis results 371

8. Conclusions

1. Introduction 337
2. Main characteristics of the case study regions 338
2.1 Bulgaria 339
2.2 Croatia 340
2.3 Greece 340
2.4 Romania 341
2.5 Slovenia 341
2.6 Comparison among the main characteristics of the regions 342
3. Methodology, data sources and policy induced transfers 343
3.1 Methodology 343
3.1.1 I-O Model 343
3.1.2 The common I-O model and the regionalisation procedure 344
3.1.3 Policy induced transfers 345
4. Formulation of policy scenarios 346
5. Summary of impact analysis results
5.1 Bulgaria 347
   5.1.1 Pre-accession funds 348
   5.1.2 Post-accession funds 348
5.2 Croatia 350
   5.2.1 Pre-accession funds 350
   5.2.2 Post-accession funds 350
5.3 Greece 351
5.4 Romania 353
   5.4.1 Pre-accession funds 353
   5.4.2 Post-accession funds 354
